

## **Join the Call for Climate!**

What are you giving up for Lent? This year, the Eastern Synod is calling on the federal government to fast from fossil fuel funding. In 2024, \$29.6 billion public dollars went toward this already profitable industry - let's tell our elected leaders how that money could be better spent caring for the most vulnerable in society and God's good Creation. Join your Climate Justice Committee in making calls and writing letters to the Minister of Environment! We'll be kicking things off with a Synod-wide webinar on Tuesday, February 24th, taking inspiration from Scripture and our church's history to chart the path toward a fairer, greener future! To learn more, register, and have your voice heard, scan the QR code below or visit
